KASUNDRA ZEEL

Android Developer

+91 9978205554 | zeelakasundra1@gmail.com | LinkedIn

PROFILE SUMMARY

Android Developer with 2+ years of industry experience in native Android development using Kotlin and Java. Strong in MVVM architecture, REST API integration, Material Design UI, and asynchronous programming with Coroutines and Flow, with experience in Room Database and Firebase.

TECHNICAL SKILL

- **Languages**: Kotlin, Java (Android)
- **Android**: Android SDK, Native App Development, Architecture Components, Lifecycle Awareness
- **UI**: XML Layouts, Material Design Components, Animations, Jetpack Compose (Beginner)
- **Architecture**: MVVM, MVC, MVP
- **Networking & Async**: REST APIs (Retrofit), Coroutines, Flow, Socket Integration (Real-time Communication), Threading
- **Database & Backend:** Room Database, Firebase
- **Tools**: Android Studio, Gradle, Git, Postman

EDUCATION

Master of Computer Applications (MCA) (Pursuing)   2025 - Present
B. H. Gardi College of Engineering & Technology, Rajkot
Gujarat Technological University (GTU)

Bachelor of Computer Applications (BCA)   2022 – 2025
OMVVIM College, Morbi
Saurashtra University
CGPA: 7.94

WORK EXPERIENCE

Android Developer   November, 2023 – Present
Qtonz Infosoft Pvt. Ltd., Rajkot
- Developed Android applications from scratch and implemented new features based on project requirements.
- Handled bug fixing, performance optimization, API integration, UI development, and regular app maintenance.

TRAINING

Android Developer   Auguest, 2023 - October, 2023
Qtonz Infosoft Pvt. Ltd., Rajkot
- Learned and implemented core Android concepts including services, permissions, API integration, and application lifecycle management.
- Assisted in UI development, bug fixing, and feature implementation while gaining hands-on experience with Kotlin, Android SDK, and best practices.

PROJECTS

Location-Based Tracking Android Application
- Built a real-time location tracking app with live sharing, geofencing, chat, and notifications, using REST APIs, sockets, FCM, and Android Foreground Services.

Expense Manager App
- Clean-architecture Android app using Room, Coroutines/Flow, and Hilt for expense tracking, reports, PDF export, and multi-language support.
